Notes

1) A $1,000 rebate plus $0.12/kWh above the retail rate production credit is available for customers of participating power distributors of TVA power. See www.tva.com/greenpowerswitch/partners/ for details.
2) A state or utility production credit or some additional utility or local incentives are available in some areas of the state. Check www.dsireusa.org for details.
3) Eligible only to customers of California's three investor-owned utilities (PG&E, SCE & SDG&E). Value in chart represent average rebate amount which is affected by various factors. Check www.gosolarcalifornia.ca.gov/ for details.
4) The Idaho incentive is a tax deduction taken over four years. Value in chart is based on total four year deduction at 7.8% tax bracket.
5) Eligible only to customers of Missouri's two investor-owned utilities (AmerenUE & KCP&L).
6) Tax credit is based on married couple.
7) Eligible only to customers of NV Energy.

Disclaimer: The information presented on these two pages provides an unofficial overview of financial incentives available in your area. It does not constitute professional tax advice or other professional financial guidance, and it should not be used as the only source of information when making purchasing decisions, investment decisions or tax decisions, or when executing other binding agreements. Midwest Engineering Consultants, Ltd. recommends consulting your local, state or utility rebate authority and/or a tax professional to validate incentive availability and eligibility for your project.

Incentives are complicated and subject to change without notice.
